

System Requirements - Release 2015b

Linux

64-Bit MATLAB and Simulink Product Families				
Operating Systems	Processors	Disk Space	RAM	Graphics
Qualified distributions*: Ubuntu 14.04 LTS and 14.10 Red Hat Enterprise Linux 6 and 7 (Red Hat 6.6 or higher is recommended) SUSE Linux Enterprise Desktop 11.3+ Debian 7.x	Any Intel or AMD x86 processor supporting SSE2 instruction set**	1 GB for MATLAB only, 3–4 GB for a typical installation	2 GB; With Simulink Coder, 4 GB is recommended	No specific graphics card is required. Hardware accelerated graphics card supporting OpenGL 3.3 with 1GB GPU memory recommended. Use of vendor-supplied proprietary drivers is strongly recommended.

* The listed distributions are those Linux distributions that MathWorks products have been validated against. It is likely that other distributions with kernel version 2.6 or later and glibc version 2.11 or later can successfully run MathWorks products, but MathWorks will be in a limited position to provide technical support for those distributions.

** You can find more information in [Solution 1-B3MR75](#).

License Management

- R2015b network licenses require a license server running FLEXnet v11.13, which is provided by the MathWorks installer. A license server that is enabling multiple releases of MATLAB must use the version of FLEXnet shipped with the latest release of MATLAB enabled by that license server.
- Starting with R2016a, the License Manager is not available for 32-bit Windows.

Support for Products on Operating Systems No Longer Supported

If you are enrolled in [Software Maintenance Service](#), MathWorks will respond to technical questions and provide workarounds when possible for a period of two years from the date when MathWorks ended support for an operating system. See the [platform road map](#) for more information.
